

Initial Coin Offering

Quantum algorithmic income stamps are cryptocurrencies that aim to provide an alternative to the high volatility of the most popular cryptocurrencies, including Bitcoin, which has made crypto investments less suitable for common transactions. We now bring you the opportunity to invest in this new cryptocurrency by way of this ICO pre-sale.

We would like to introduce you to the "quantum algorithmic income stamp," which was created based on an algorithm called "income stamp quantum key allocation," which is based on the quantum phenomenon of entanglement.

The Bruterio Metaverse Foundation is a social community that is geared toward creating value by using the "Bruterio Metaverse Income Plan." The Bruterio Metaverse Income Plan was created to help create value for members of the Bruterio community to give them the opportunity to become rich or at least live comfortably.

When you become a member, you will be assigned to a Bruterio quantum district. There are 20 districts in the Bruterio Metaverse community. Each district has its own digital currency called a "district Bruterio income stamp." There is also a basic digital currency that all people in the Bruterio community use.

The basic digital currency that all members use is called a "basic Bruterio income stamp." A basic Bruterio income stamp is a hybrid of a digital currency and a real physical stamp. Also, all of the 20 quantum districts have their own "district quantum income stamps," which are hybrids of a digital currency and a physical stamp.

Every resident of a Bruterio quantum district will receive a monthly income, which will be paid in basic Bruterio quantum income stamps based on their age and number of dependents under the age of 18.

1 unit of a basic Bruterio quantum income stamp is called a book of stamps. So, for example, if a person wants to sell you an iPhone for 10 units of basic Bruterio income stamps, then he or she would be selling you his or her iPhone for 10 books of Bruterio.

Here are the monthly income charts for all members of the Bruterio Metaverse Foundation community:

Age:

16–18 = 1 book

19–25 = 2 books

26–30 = 4 books

31–40 = 8 books

41–50 = 16 books

51 and up = 32 books

50% of a member's monthly income must be used to purchase products from our partnership store, which will have a variety of products and services that a member can use.

Each member can buy currency from their own district at the local resident price. The local resident price will be cheaper than the regular market price, meaning that a person who buys a district Bruterio quantum income stamp from a quantum district they are not from will pay the market price. This allows each member to make a profit no matter what quantum district they are from. Here is an example of a price chart:

(Quantum District 1) Local resident price = 30.00 per book / Market price = 35.00 per book
(Quantum District 2) Local resident price = 190.00 per book / Market price = 200.80 per book
(Quantum District 3) Local resident price = 90.00 per book / Market price = 105.00 per book

The Bruterio Metaverse Foundation will start off with its own exchange platform first. The only currency we will be selling on other exchanges is the "basic Bruterio income stamp."

Liquidity is the ability to buy or sell an asset quickly and in large volume without substantially affecting the asset's price. A high level of liquidity is the key characteristic of any good cryptocurrency.

Every quarter, the Bruterio Metaverse Foundation will do a (QPL), which stands for (Quarterly Proof of Liquidity). We will do this by converting all members' accounts into cash and placing the funds with an independent 3rd party such as Goldman Sachs, Chase Bank, or Bank of America, and placing all funds on hold for a week. By doing this, we will create value.

We will do a "QPL" to make sure that we have the ability to stand strong in hard economic times. Most of the cryptocurrencies out there will not do a (QPL) because it would cut through all the bullshit and show the true value of their digital currency.

So the question is, how would a Quarterly Proof of Liquidity work?

For right now, only the (basic Bruterio quantum income stamp) would be traded on the major exchanges, but all of the 20 district Bruterio income stamps would only be traded on the (Bruterio Metaverse Exchange). Therefore, the (basic Bruterio quantum income stamp) would not have a Quarterly Proof of Liquidity because the basic Bruterio income stamp is inextricably linked with the other 20 district Bruterio income stamps.

So the price of the basic Bruterio income stamp would fluctuate based on the performance of the 20 quantum districts' income stamps, but more importantly, the QPL would place us as one of the top 10 digital currencies in the market.

So here is the rundown of the QPL: every 3 months, the Bruterio Metaverse Foundation will convert all of the 20 quantum income districts into cash. We will then place those funds in an account with a well-known investment bank or accounting firm to hold in an escrow account for a week. The investment bank or accounting firm will certify that the funds are there and accounted for. After the week is over, we will reactivate all members' accounts back to normal.

The Bruterio Metaverse Foundation is a real community with a real social network. When you become a member, you will be assigned to a quantum district. You will have the choice to be an independent member, or you can start your own group, and then you would have your own family. The head of any group would have the rank godfather or godmother, but if you choose to be independent, your rank would be independent member on mantime or independent member on womantime.

A family can consist of a maximum of 20 people and a minimum of 5 people. Every member can earn bonus basic Bruterio income stamps, but people who belong to a family must share their bonus income with their group. Independent members keep all their bonus income without having to share with anyone. There are advantages and disadvantages to being an independent member or being in a group.

Group members sometimes can make a lot of bonus income because they get a share of other people's bonus that are members of their family, but that can backfire if no one is making any bonus income except a few people in their group. Whereas an independent member will make all of his or her bonus income without having to share with anyone, but sometimes an independent member may not get any bonus income for a month or so. But if you are in a group, 9 times out of 10, you will get a bonus every month, even if it is small.

All district Bruterio income stamps will be minted only by completion of a (metaverse social mining mission). Metaverse social mining missions are a new alternative to Bitcoin mining, which can cause harm to the environment and cause millions of dollars in waste of electrical bills and other related expenses.

We will partner with new and existing businesses and our members to mint (district Bruterio income stamps). Here is an example of a metaverse social mining mission: a real estate developer agrees to partner with us, and we sign a merchant agreement stating that their next real estate transaction will be done in (district Bruterio income stamps) only. Once the transaction is done, then we will proceed to mint a new district Bruterio income stamp.

One of the fundamental rules of the (income stamp quantum key allocation algorithm) is that all district Bruterio income stamps must be minted with some type of real labor. That way, the district Bruterio income stamp will hold a certain price value as a medium of exchange. The social mining missions have no limits, but what it will do for certain is totally disrupt the Bitcoin mining system and the cryptocurrency industry as a whole.

The Bruterio quantum income stamp is here to change the crypto economy. The way we invest, spend, and save remains cumbersome and expensive. Bitcoin started a revolution by providing the ability to create scarcity. This innovation laid the foundation for the Bruterio Metaverse Foundation to change the way people view crypto, and for that we thank all of the people across the world who have contributed to the cryptocurrency ecosystem. Without them, Bruterio Metaverse Foundation would not exist today.

We will be offering for a limited time only the ability to buy our cryptocurrency at a very cheap price. You do not want to be the person who missed out again on another wonderful opportunity. We believe that our cryptocurrency will be one of the top 5 cryptocurrencies in 2 years or so, if not quicker.

When you invest in this ICO presale, you will be put on the "SAFIS reserve list," which stands for simple agreement for future income stamps. In this ICO presale, we will be selling each Brutero income stamp for 10 cents each. You can buy as many income stamps as you want.

Our market cap is 100 billion income stamps. We will be putting 30 billion income stamps in circulation. Our fundraising goal is 97.99 million dollars. After this presale, we will do an official launch and list our cryptocurrency on a major exchange like Coinbase. You must make a minimum investment of 20 dollars. Always remember your original investment will be 100% refundable at all times for this ICO presale.

I know what you are thinking when you see an investment like this: "Right now I can't afford to invest my money with this crazy shit going on in the economy!!!"

The price of eggs is crazy. Tariffs are sky high. Government workers are being laid off left and right. We live in uncertain times for sure.

We here at the Brutero Metaverse Foundation will be doing something that has never been done in the crypto industry. We will be the first to start a buy now, pay later program, and you can be part of that for as little as 100 dollars.

If we are being honest with ourselves, we spend money all the time on bullshit that we don't even need and that won't even make us any money. Now is the time to change your life with an investment that will change your life for the better and will allow you to buy a car, home, or pay off all your bills and even get that divorce you have been wanting to get for so long!!!!

Don't let this once-in-a-lifetime chance pass you by.

A lot of people remember when Bitcoin was being traded for a pizza and was less than 5 dollars, but then Bitcoin started going up and it was just too expensive for the average person to invest in. We have the perfect solution to that problem.

If you miss out this time, you only have yourself to blame. It will not be because of a lack of money. The "BUY NOW PAY LATER CRYPTO PROGRAM" is right here for you to use. Here is how it works:

You only have to put 10% down of the original price of the quantum income stamps you want to buy and pay a small monthly payment of 20 dollars per month until you have paid off the loan in total. This is a "no interest loan" with no transaction fees. We do not do any credit checks. If you miss a payment for any reason, just let us know and we will work it out with you.

"OUR BUY NOW PAY LATER CRYPTO PROGRAM" is very simple. Here is our pricing format:

[1] A 100 dollar down payment will get you 1,000 dollars worth of crypto income stamps with an extra bonus of 10,000 income stamps.

[2] A 500 dollar down payment will get you 5,000 dollars worth of crypto income stamps with an extra bonus of 50,000 income stamps.

[3] A 1,000 dollar down payment will get you 10,000 dollars worth of crypto income stamps with an extra bonus of 100,000 income stamps.

[4] A 10,000 dollar down payment will get you 100,000 dollars worth of crypto income stamps with an extra bonus of 1 million income stamps.

[5] A 100,000 dollar down payment will get you 1 million dollars worth of crypto income stamps with an extra bonus of 10 million income stamps.

All ICO participants will not be issued actual quantum income stamps in the presale but will be put on the "SAFIS reserve list." All ICO participants will get their crypto from our Solana blockchain-based (income stamp token). We will be using the Solana blockchain for now so that everything will go smoothly.

The funds raised by this ICO will be used for the following:

1. Creating the quantum algorithmic income stamp blockchain that will support the native cryptocurrency "quantum algorithmic income stamp token."
2. Hiring specialized blockchain auditors to review the "quantum algorithmic income stamp" blockchain code.
3. Social media marketing and regular print and television marketing, to include the production of an infomercial.
4. Hiring legal counsel to make sure the Bruterio Metaverse Foundation is in legal compliance with all state and federal regulations concerning cryptocurrency.
5. A small portion of the funds raised will go to payment of salaries for no more than 5 employees for no more than 3 years and payment of listing fees that a crypto exchange such as Coinbase may require to be listed on their exchange.

This offer will only last for a limited time. Always remember that Bitcoin traded as low as 40 cents; now it's worth over 70,000 per Bitcoin. This is your chance to change your life. Any money you invest in this ICO is 100% refundable at any time.
